PORK PRODUCTS

INGREDIENTS: PORK, WATER, SALT, CORN SYRUP SOLIDS, SODIUM LACTATE, FLAVORINGS.

Keep Refrigerated

FIRSTROW FRANKS

Beef Frankfurters, Beef Polish Sausage, Spicy Beef Polish Sausage and other specialty sausage products are all fully cooked products, ready to heat and eat. When heating these products you may find the following information useful.

ROLLER GRILLS

Always start with not frozen product. Use the lowest possible effective temperature setting. Cooking the product on a "high" setting or from frozen will increase the risk of overcooking. Heat to and hold at 170f.

STEAMER

Place product in a perforated pan above the water line (the steam does the heating). It may be useful to hold in one pan while heating in another.

WATER HEATED

The most common method to heat and serve. Drop product into boiling water reduce heat to a slow simmer. When product is ready to serve (170f internal) reduce heat further to maintain serving temperature.

CHAR BROIL

Place product on the grilling appliance. Make every effort to minimize the amount of time the product is on the grill as a heated grill can quickly cook the moisture out of the sausage, resulting excessive wrinkles. We suggest pre-heating the product in water or steam prior to placement onto the grill. Leave the product on the grill for as short a time as is required to provide a grilled appearance and flavor.

MICROWAVE

Direct microwave heating of sausage products generally has an adverse affect on the product. At a minimum it will be necessary to wrap the product with a damp towel or water cook in water heated in the microwave to produce an acceptable product.
